

GENERAL TERMS AND CONDITIONS
(Continued)

3. QUALITY (Continued)

3.2 Quality of Gas Delivered by Transporter at the Delivery Point(s):
(Continued)

- (b) Impurities: The gas shall be commercially free of objectionable odors (excluding odorant added to natural gas for safety reasons or to comply with federal regulations), solid matter, dust, gums, and gum forming constituents, or any other substance which interferes with the intended purpose of merchantability of the gas, or causes interference with the proper and safe operation of the pipelines, meters, regulators, or other appliances through which it may flow.
- (c) Liquids: The gas shall be free of water and hydrocarbons in liquid form at the temperatures and pressures at which the gas is delivered.
- (d) Odorization: The gas delivered to each Delivery Point shall be odorized consistent with the parameters set forth in Section 192.625 of Title 49 of the Code of Federal Regulations.

As between Transporter and Shipper, Transporter shall have no obligation whatsoever to provide any warnings concerning the delivered gas, including but not limited to warnings on safe handling and use, appropriate engineering controls, or safe work practices.

In the event Transporter elects to no longer inject odorant as described above, Transporter will issue a written notice to such effect to all Shippers and Receiving Parties at least twelve (12) months in advance of ceasing odorant injection.

- (e) Heating Content: Transporter is to tender delivery to Shipper only natural gas which is commercial in quality containing an average gross total heating value of not less than 975 Btus per cubic foot.
