

GENERAL TERMS AND CONDITIONS
(Continued)

3. QUALITY (Continued)

3.4 Failure to Meet Specifications.

Transporter shall have the right, exercisable by giving written or oral notice to the party tendering the RNG to the RNG Receipt Point, to require the remedy of any failure to deliver gas in accordance with Section 3 of the General Terms and Conditions. Transporter may refuse to accept all or any portion of such gas in the event gas received at the RNG Receipt Point fails to conform to the specifications, as evidenced by: (a) the latest analysis derived from an on-line chromatograph or other testing equipment, (b) a sample taken mutually and analyzed by a chromatograph or other testing equipment, (c) a sample taken mutually and analyzed by an independent certified third-party laboratory, or (d) other verifiable evidence acceptable to Transporter.

3.5 Accepting Gas Which Fails to Meet Specifications.

Transporter, in its reasonable judgment, may accept Gas or RNG that does not meet quality specifications on a non-discriminatory basis provided: (1) such acceptance does not jeopardize Transporter's ability to meet its obligations under Section 3.2; and (2) such acceptance occurs on a short-term basis. Transporter's acceptance of such Gas or RNG shall not obligate Transporter to accept subsequent Gas or RNG from the interconnecting party that does not comply with Section 3.1.

3.6 Gas Analysis Equipment

After the in-service date of an RNG Receipt Point, if Transporter, in consultation with the interconnecting party, determines that any additional or modified Gas analysis or control equipment is needed to accurately monitor the quality of Gas received at the RNG Receipt Point and control the receipt of Gas failing to conform to the applicable specifications in Section 3 of the General Terms and Conditions, then the interconnecting party, at such Receipt Point shall install the necessary additional or modified equipment.

Unless otherwise mutually agreed, if Transporter installs such additional or modified Gas analysis or control equipment, the interconnecting party will provide a contribution in aid of construction to Transporter for all actual costs incurred by Transporter and reimburse Transporter for any related income taxes.
