

GENERAL TERMS AND CONDITIONS  
(Continued)

3. QUALITY (Continued)

3.1(a) Quality of Gas Tendered by Shipper to Transporter at the Receipt Point(s): (Continued)

- (8) Temperature: The temperature of the gas tendered to Transporter hereunder shall not exceed one hundred twenty (120) degrees Fahrenheit.
- (9) Water Vapor: The gas tendered shall not contain more than seven (7) pounds of water in vapor phase per one million (1,000,000) cubic feet.
- (10) Toxic or Hazardous Substance: The gas shall not contain any toxic or hazardous substance in concentrations which, in the normal use of the gas, may be hazardous to health, injurious to pipeline facilities, or be a limit to merchantability or be contrary to applicable government standards.
- (11) Bacteria: The gas, including any associated liquids, shall be commercially-free of any microbiological organism, active bacteria or bacterial agent capable of causing or contributing to: (i) injury to Transporter's pipelines, meters, regulators, or other facilities and appliances through which such gas flows or (ii) interference with the proper operation of Transporter's facilities. Microbiological organisms include, but are not limited to, sulfate reducing bacteria (SRB), acid producing bacteria (ACB), and iron-oxidizing bacteria (IOB). When bacteria or microbiological organisms are considered a possibility, Shipper(s) desiring to nominate such gas, upon Transporter's request, shall cause such gas to be tested for bacteria or bacterial agents utilizing the qPCR/GTI test or other acceptable test method as determined by both parties. Commercially-free is defined as containing no more than  $4 \times 10^4$ /scf.

3.1(b) Quality of RNG received at RNG Receipt Point by Transporter:

- (1) RNG delivered into Transporter's system at an RNG Receipt Point shall conform to the gas quality specifications set forth in Section 3.1(a) except when Transporter, in its reasonable judgment, determines it can accept RNG: (a) containing not more than a combined total of four percent (4%) by volume of inerts including, but not limited to, carbon dioxide (2% maximum), nitrogen (3% maximum), and oxygen (0.2% maximum); and/or (b) with a total gross heating value of not less than 950 Btu, provided that, in Transporter's reasonable judgment, Transporter can meet the requirements of Section 3.2 of the Tariff. RNG delivered into Transporter's system at an RNG Receipt Point shall be delivered at a temperature no less than forty (40) degrees Fahrenheit nor greater than one hundred twenty (120) degrees Fahrenheit.
