

RATE SCHEDULE LGS-2  
INTERRUPTIBLE LIQUEFIED NATURAL GAS STORAGE SERVICE

2. APPLICABILITY AND CHARACTER OF SERVICE (Continued)

- (d) The vaporization of such stored liquid on demand by Shipper pursuant to Section 4.7(d) of the General Terms and Conditions of this tariff in quantities not to exceed Shipper's Daily Delivery Capacity; and
- (e) The delivery of equivalent quantities of natural gas, less Gas Used by Great Basin pursuant to Section 5 hereof, vaporized from Shipper's LNG inventory pursuant to Section 4.7(d) of the General Terms and Conditions of this tariff for Shipper into Transporter's pipeline system at the point of interconnection between Transporter's LNG Plant and its main transmission line.

2.2 The service provided under this rate schedule shall be interruptible and shall be subject to interruption at any time when Transporter determines that the total requests for service hereunder exceed Transporter's capability to meet such requests, or as provided elsewhere in this rate schedule, or due to operating conditions or conditions of force majeure on Transporter's system as set forth in Section 4.5 and Section 6.1 of the General Terms and Conditions of this tariff. In the event of such interruption, Transporter shall provide service as follows:

- (a) Transporter shall provide Shipper with as much advance notice as is practical of any interruption of service;
- (b) Shipper's service under this rate schedule shall be interrupted to the extent necessary to enable Transporter to meet its service obligations to all firm Shippers and to all interruptible Shippers with a higher priority of service than Shipper. For Shippers under this rate schedule with equal priority of service, Shipper's service under this rate schedule shall be interrupted on a pro rata basis in proportion to the ratio of its nomination for the day of such interruption for service under this rate schedule up to its Daily Delivery Capacity hereunder to the total of all nominations for such day for service under this rate schedule; and
- (c) While Transporter shall not be responsible for any interruption that is due to Shipper's failure to adequately maintain its LNG inventory or to schedule the use of such inventory, Transporter, in the event of such situations, will permit Shipper to arrange for the transfer of inventory balance among the other Shippers, in accordance with Section 4.7(c)(5) of the General Terms and Conditions of this tariff.
